

The Colours: I used NorKam Yellow for the base, but with a hint of TNT Blue hiding underneath to reflect the lense I am using as I work towards success in the Careers Program

The Shape: As I was playing with ideas I realized that the end connects back to the beginning. The Career Life

Planning topics seem to be a natural touch back to the self awareness pieces, so I used a cylinder to physically bring the end back to the beginning

Loose Threads: The ideas that are hanging from the top of the cylinder, are questions, concerns or things to be aware of, but that don't have answers/solutions yet

Overarching ideas: the pieces hanging from the umbrella that are part of all I will do in the Course/Program e.g. curriculum, Problem based Learning, assessing Core Competencies, The Capstone

Lesson ideas: These are at various stages of development from lessons planned, with videos, essential questions, journals etc from vague ideas or titles

Tidbits: things that still haven't really found a place but might be stapled to the umbrella. Who knows what these might become?

Implementation Guide: The 10- 12 Implementation guide is hanging at the top of everything. Everything we do must fit under this guideline

Core competencies: Stickers show where various Core Competencies may be assessed

NorKam Attributes: The attributes of a NorKam Grad are: adaptability, inquiry and global citizenship. Areas where these attributes can be highlighted are colour coded with the school logo
