

Natural gas safety

Examples of natural gas appliances

Safety around gas appliances

- If using a natural gas stove, keep loose clothing away from the flame and make sure an adult is around to help.
- Keep hands away from the flames of gas appliances.
- Turn off gas appliances when finished using them.
- Don't play around or leave things near gas appliances.

Natural gas safety scenario

- You're at home watching TV and you notice a rotten egg smell. You know this means there's a gas leak.

Four steps to natural gas safety

You smell rotten eggs – that means natural gas.

- **Step 1:** Tell an adult right away.
- **Step 2:** Go outside and move away from the smell.
- **Step 3:** Once outside, have an adult call FortisBC or 911.
- **Step 4:** When FortisBC tells you it's safe, you can go back inside.
